I acknowledge and agree with no comment on the evidence.

I disagree with your decision not to answer a simple and reasonable question on procedure given the seriousness of corruption.

Please either assure me that the submitted evidence will be fully considered and then specifically referenced in a public document in due course as proof of consideration or clarify on what basis the submitted evidence will be disregarded with options for me to guarantee that it will be fully considered and then specifically referenced in a public document in due course as proof of consideration.

Yours truthfully,
Graeme Jones
